News from Sailer Environmental, Inc.

E-Newsletter #5
January 2012

Greetings!

Happy New Year! Start 2012 off right by planning out your environmental compliance for the year. Do you have an underground storage tank? Contact your tank testing company and schedule all of your required testing now. Is your facility subject to the Industrial Stormwater General Permit? Sign up to receive emails when a "sample-able" storm is predicted (see below), then mark your calendar for a year's worth of stormwater inspections.

Remember, we're here when you need us! Let us worry about your environmental compliance so you can concentrate on running your business.

Wishing you all the best in 2012!

Get Email Alerts for Stormwater Sampling

Would you like to receive an email when there is a 70% chance or greater that a storm which meets the sampling criteria for the Industrial Stormwater General Permit will reach your facility within 24 hours? We have teamed with Custom Weather, Inc. to develop a customized weather alert service for stormwater sampling in all 50 states.

Check out www.stormwatersamplingalert.com for more information or give us a call at 203-245-7744.

It's EPCRA Tier II Reporting Time Again!

Did you know that 2011 marked the 25th anniversary of the Emergency Planning and Community Right-To-Know Act (EPCRA)? Start the 26th year of EPCRA off right by submitting your RY2011 EPCRA Tier II Report early! The Tier II report is an annual requirement which is due on or before March 1, 2012.

EPCRA Tier II Reports are required for any facility that stores hazardous chemicals or Extremely Hazardous Substances (EHS) above specified quantities. For instance, if your facility stored more than 10,000 pounds of gasoline (about 1,615 gallons), diesel fuel (about 1,418 gallons), or more than 500 pounds of sulfuric acid (in about 100 lead-acid batteries) at any time during the 2011 calendar year, you may be required to file an EPCRA Tier II report form.

SEI can assist you with your EPCRA reporting requirements. Email Elke Sutt (esutt@sailerenv.com) or call the office for more information.

Stormwater Pollution Prevention

Plan Training

We continue to offer Stormwater Pollution Prevention Plan training. We've been focusing on our clients for whom we have prepared a SWPPP, but can provide training to anyone subject to the GP. The course provides a detailed introduction to your facility's SWPPP as well as a tutorial on taking a stormwater sample. We can also conduct the required staff training for your facility.

Call us at 203-245-7744 for more information, or visit the "Recent News" section of our website for more information.
