News from Sailer Environmental, Inc.

E-Newsletter #4
 November 2011

Greetings!

This fall marks the long-anticipated renewal of the Connecticut Industrial Stormwater General Permit and Connecticut's first boat hauling season after the expiration of the consent order. These new requirements now apply in addition to your standard environmental responsibilities for the fall, such as manifesting your hazardous waste, taking your stormwater samples, even logging your swimming pool drainage in compliance with the Swimming Pool Wastewater General Permit.

Remember, we're here when you need us! Let us worry about your environmental compliance so you can concentrate on running your business.

Get Email Alerts for Stormwater Sampling

In Connecticut, the Industrial Stormwater General Permit (GP) renewal became effective on October 1, 2011. The new GP requires, among other things, stormwater monitoring four times a year, instead of the annual sampling that was required in the now-expired permit. We are excited to announce that we have teamed up with Custom Weather, Inc. to develop a customized weather alert service that will send you an email message when there is a 70% chance or greater that a storm which meets the sampling criteria will reach your facility within 24 hours. We can also customize this alert system to meet any state's sampling criteria.

The cost for this service is \$250 per year. Call us at 203-245-7744 or simply reply to this email for more information.

Troubleshooting: Pressure Wash Wastewater

We are right in the middle of the first hauling season after the CT DEEP December 2010 deadline for discharge of pressure wash water. Now there are no excuses for discharging pressure wash wastewater back into the marina basin. You should be collecting it or pre-treating it and sending it to the sanitary sewer, not letting it run back into the water. DEEP is out enforcing this. Let us know your story--have you been inspected? Have you had trouble getting your wastewater hauled in a timely manner? We'd like to know. Call us at 203-245-7744 or respond to this email to let us know your story.

We've been giving training sessions on the new Industrial Stormwater GP for the last six weeks. We've been focusing on our clients for whom we have prepared a SWPPP, but can provide training to anyone subject to the GP. The course provides a detailed introduction to your facility's SWPPP as well as a tutorial on taking a stormwater sample. We can also conduct the required staff training for your facility.

Call us at 203-245-7744 for more information, or visit the "Recent News" section of our website for more information.
